PROJECTS

Project: [Sneaker Manager](#)

Tech Stack: Tech Stack: React, Next.js, Tailwind CSS, TypeScript, Chart.js, Redux

- Developed a comprehensive web application aimed at benefiting sneaker resellers, like myself, by streamlining the process of tracking, managing, and analyzing sneaker inventory and sales.
 - Inventory Management: Add, view, and delete sneaker items with detailed tracking.
 - Revenue and Profit Tracking: Dynamic charts for visualizing financial metrics.
 - Expense Management: Detailed expense tracking to manage costs and maximize profit.
 - Built-in Calculators: Tools for accurate pricing and profit margin calculations.

Project: [Real Time Stock Dashboard](#)

Tech Stack: HTML, Tailwind CSS, JavaScript, React.JS, REST API, Recharts, VSCode

- Developed a comprehensive stock dashboard application built with React, offering features such as stock search, detailed company information, real-time stock quotes, and interactive price charts. It also supports a dark mode for enhanced user experience.
- The app leverages the Alpha Vantage API to fetch real-time and historical stock data, automatically fetches and updates stock data every 60 seconds, ensuring users have the latest information.

CERTIFICATIONS

- [Certified Web Developer](#) | Johns Hopkins University | '24
